-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 02 January 2002.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-25 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-25 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

**Priority under 35 U.S.C. §§ 119 and 120**

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 8, 15, 19, 2, 3, 5, 6, 7, 9, 10, 12, 13, 14, 15, 16, 18, 19, 20, 21, 23, 24 and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Rusu et al. (U.S. Patent Application 2003/0065960).

Regarding claim 1:

Rusu discloses a microprocessor comprising at least one throttling mechanism (abstract); and a thermal control subsystem to estimate an amount of power used by said microprocessor and to control said at least one throttling mechanism based on said estimated power usage (page 1, section 0009).

Regarding claim 8:

Rusu discloses a method comprising estimating an amount of power used by a microprocessor (abstract); and controlling at least one throttling mechanism

incorporated in the microprocessor based on said estimated power usage (page 1, section 0009).

Regarding claim 15:

Rusu discloses a thermal control system comprising a power usage estimator to estimate an amount of power used by a microprocessor based on the number of occurrences of at least one activity performed by the microprocessor during a defined time period (page 2, section 0018, 0020, page 4, section 0036, fig. 3, unit 304, 306, 308); and a throttling control unit to control at least one throttling mechanism incorporated in the microprocessor based on the estimated amount of power used by the microprocessor (page 1, section 0009).

Regarding claim 19:

Rusu discloses a machine-readable medium that provides instructions, which when executed by a microprocessor cause said microprocessor to perform operations comprising estimating an amount of power used by a microprocessor (page 2, section 0020); and controlling at least one throttling mechanism incorporated in the microprocessor based on said estimated power usage (page 1, section 0009).

Regarding claims 2, 3, 5, 6, 7, 9, 10, 12, 13, 14, 15, 16, 18, 19, 20, 21, 23, 24 and 25:

Rusu discloses a method, a thermal control system, a machine-readable medium, microprocessor system including based on number of occurrences of the activity performed in the microprocessor (page 2, section 20) the microprocessor wherein thermal control subsystem includes a power usage monitoring unit which determines the number of occurrences of at least one activity performed by the microprocessor (abstract) within a sampling time period and computes the estimated power usage based on (1) the count value associated with said at least one activity (page 2, section 0020), (2) current clock frequency and (3) operating voltage level of the microprocessor (page 1, section 0009, fig. 3, unit 302); compare to a threshold level to activate control power (page 2, section 0019), the throttling mechanism is activated in a deterministic manner by the thermo control system (page 1, section 0009, 0012), using cache memory access and instruction decoding (page 2, section 0020, fig. 1, unit 104).

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

a. Claims 4, 11, 17 and 22 rejected under 35 U.S.C. 103(a) as being unpatentable over Rusu et al. (U.S. Patent Application 2003/0065960) in view of Kenny et al. (U.S. Patent 5,287,292).

Ruso discloses a method including the subject matter discussed above except the use of averaging the power estimated power usage, the power value obtained during previous sampling time period. Kenny discloses the use of averaging the power estimated power usage, the power value obtained during previous sampling time period (col. 3, lines 5-13), in order to have an accurate assessment of the circuits total current flow (co. 3, lines 5-13).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Ruso to have the use of averaging the power estimated power usage, the power value obtained during previous sampling time period taught by Kenny in order to have an accurate assessment of the circuits total current flow (co. 3, lines 5-13).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung S Lau whose telephone number is 703-305-3309. The examiner can normally be reached on M-F 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached on 703-308-3126. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-5841 for regular communications and 703-308-5841 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
